</> Summary

Assistant Professor at the University of Warwick, working on AI safety and the reliability of large language models. I develop probabilistic methods for adversarial robustness, out-of-distribution detection, and trustworthy generative models.

🔗 Work Experience

WMG, University of Warwick Assistant Professor	Coventry, United Kingdom Mar. 2026 -
Department of Computer Science, University of Manchester Postdoc Research Associate	Manchester, United Kingdom Nov. 2024 - Feb. 2026

🏛️ Education

Trinity College, University of Cambridge PhD in Computer Science	Oct. 2019 - Dec. 2024
MASt in Mathematics (Part III of the Mathematical Tripos)	Oct. 2018 - Jun. 2019
MPhil in Advanced Computer Science	Oct. 2017 - Jun. 2018
School of Computer Science, University of Manchester BSc (Hons) in Computer Science and Mathematics	Sep. 2014 - Jun. 2017

🔗 Internships

MediaTek Research Deep Learning Intern Host: Dr. Alberto Bernacchia	Cambridge, United Kingdom Aug. 2024 - Nov. 2024
Participated to a project in accelerating the sampling of diffusion models by proposing a new second-order estimation of the posterior, published in TMLR.	
University College London Visitor Hosts: Dr. David Barber and Dr. Mingtian Zhang	London, United Kingdom July. 2023 - Oct. 2023
- Worked on a new image generative model that based on Diffusion models. - Worked on Amortized LoRA, a more principle and probabilistic way to generate LoRA parameters.	
Kirin AI Group, Huawei Research Intern (Part-time) Host: Mr. Arnau Raventos	Cambridge, United Kingdom Nov. 2021 - Oct. 2022
- Conducted a comprehensive evaluation of various traditional and AI-based frame interpolation methods, providing insights for the product department to leverage in their decision-making processes. - Contributed to an AI global illumination project, successfully implemented various samplers within the Mitsuba 3 framework.	
Noah's Ark Lab, Huawei Research Intern Hosts: Dr. Yitong Sun and Dr. Shifeng Zhang	Shenzhen / Beijing, China Sep. 2020 - Sep. 2021
- Co-developed the local autoregressive model, which significantly advanced the state-of-the-art in Out-Of-Distribution (OOD) detection and lossless compression. The empirical evidence supporting this enhancement was recognized and published in NeurIPS 2021. - Contributed to a computer vision project through researching deep learning uncertainty for active learning applications. The outcomes of this work were recognized and published in BMVC 2021. - Contributed to an indoor positioning project leveraging WiFi signal strength. I specifically conducted research on Deep Gaussian Processes, leading our team to enhance indoor positioning accuracy. The successful results of this work were published in IPIN 2021.	
University of Cambridge Course Supervisor (Teaching Assistant)	Cambridge, United Kingdom Oct. 2019 - Dec. 2024

- Supervised IA Algorithms (2020 Lent, 2023 Lent), IA Machine Learning in Real World (2020 Lent), IA Introduction to Probability (2020 Easter, 2021 Easter), IB Further Java (2020 Michaelmas), IB Data Science (2022 Michaelmas, 2023 Michaelmas), IB Further Graphics (2022 Michaelmas) and II Machine Learning and Bayesian Inference (2023 Lent)

MRC Biostatistics Unit, University of Cambridge

Cambridge, United Kingdom

Research Assistant | Hosts: Dr. Sofia Villar and Dr. David Robertson

Jul. 2019 – Sep. 2019

- Developed a simulation system to tackle the multi-armed bandit problem (MABP) in clinical trial settings and pioneered a unique test statistic for binary response MABP situations. Although the time constraints prevented this work from being formalized into a publication, it provided substantial practical and theoretical insight.

Tencent (WeChat AI)

Beijing, China

R & D Intern | Host: Dr. Jie Zhou

Jul. 2018 – Sep. 2018

- Engaged in comprehensive exploration and research in deep reinforcement learning and evolution strategies.

Amazon (Alexa)

Cambridge, United Kingdom

Applied Scientist Intern | Host: Dr. Emilio Monti

Jun. 2017 – Sep. 2017

- Employed the Seq2Seq model, the predecessor of the Transformer, with the Attention mechanism for semantic parsing tasks. Semantic parsing involves translating natural language into a structured internal language used for database or knowledge base querying.

Robotics Institute, Carnegie Mellon University

Pittsburgh, United States

Student Intern | Host: Dr. Stelian Coros

Jun. 2016 – Sep. 2016

- Contributed to the implementation of a general stance controller for 3D-printable robotic creatures. The controller's adaptability enables it to be used with any human-designed multi-foot robots, hence its designation as 'general'.

Academic Service

I have served as a reviewer for the following conferences:

- NeurIPS (2024, 2025, 2026)
- ICML (2025, 2026)
- ICLR (2025, 2026)
- AISTATS (2023, 2024, 2025, 2026)
- CVPR (2025, 2026)
- ICCV / ECCV (2025, 2026)
- ACM MM (2025)
- AAAI (2026, 2027)
- COLM (2026)
